

# PhosCapt<sup>®</sup> MP

**Phosphine fumigation monitoring**  
Guarantees fumigation efficacy, security & traceability

PhosCapt MP gives **real-time PH<sub>3</sub> concentration** data to monitor phosphine fumigation.

**Multiple devices** can operate simultaneously to increase the number of monitoring lines for large facility fumigations.

# PhosCapt<sup>®</sup> MP

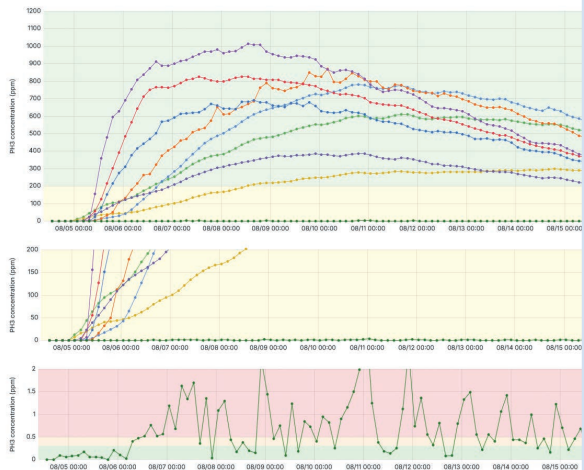

## Essential phosphine fumigation tool

Dual gas sensor with automatic switching between **high and low concentration** sensors to monitor fumigation **efficacy, degassing and security** on 12 sampling lines up to 650 feet (200 m) in length.

Gas concentration data **accessible online in real time** or via email and also recorded in the non-volatile memory in Excel format for **traceability**.

- ✔ **Email alarms** with high and low thresholds
- ✔ **USB, Ethernet and cellular** connectivity
- ✔ **Reliable, fully automatic and easy to set up**
